## **Product Specifications**

**Product**: Peroxidase-conjugated AffiniPure Rabbit Anti-Chicken IgY<sup>††</sup>(IgG) (H+L)

Code Number: 303-035-003

**Lot Number**: 124196

Physical State: Freeze-dried solid

**Size:** 1.5 ml

Antibody Concentration: 0.8 mg/ml

<u>Suggested Dilution Range</u>: 1:500 - 1:5,000 for immunohisto/cytochemistry

1:5,000 - 1:100,000 for ELISA and Western blotting with chromogenic substrates

1:10,000 - 1:200,000 for Western blotting with ECL substrates

Peroxidase: Purified from horseradish root

Buffer: 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6

Stabilizer: 15 mg/ml Bovine Serum Albumin (lgG-Free, Protease-Free)

<u>Preservative</u>: None (Warning: Use of sodium azide as a preservative will substantially inhibit the enzyme activity of horseradish peroxidase.)

Reconstitution and Storage: Store freeze-dried powder at 2-8°C. When ready to use, rehydrate with 1.5 ml dH<sub>2</sub>O and centrifuge if not clear. Product is stable for about 6 weeks at 2-8°C as an undiluted liquid. Prepare working dilution fresh each day. For extended storage after rehydration, aliquot and freeze at -70°C or below. Avoid repeated freezing and thawing. Alternatively, add an equal volume of glycerol (ACS grade or better) for a final concentration of 50%, and store at -20°C as a liquid. Note: adding glycerol reduces the stated protein concentration and dilution range by one-half. *Expiration date:* one year from date of rehydration. The expiration date may be extended if test results are acceptable for the intended use.

Warning: Confirm that glycerol is ACS grade or better before adding to this product. Lower grades of glycerol may seriously inhibit peroxidase enzyme activity.

**Purity:** The antibody was purified from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

<u>Antibody Specificity</u>: Based on immunoelectrophoresis and/or ELISA, the antibody reacts with whole molecule chicken IgY. It also reacts with the light chains of other chicken immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. The antibody may cross-react with immunoglobulins from other species.

Country of Origin: USA

Note: For in vitro research use only, not for diagnostic or therapeutic use. This product is not a medical device.

††IgY is the original designation for the IgG-like protein found in both serum and egg yolk.
