SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general	: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).
First-aid measures after inhalation	: Using proper respiratory protection, move the exposed person to fresh air at once. Immediately call a poison center, physician, or emergency medical service.
First-aid measures after skin contact	: Remove contaminated clothing. Drench affected area with water for at least 5 minutes. Obtain medical attention if irritation develops or persists.
First-aid measures after eye contact	: Rinse cautiously with water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical attention if irritation develops or persists.
First-aid measures after ingestion	: Rinse mouth. Do NOT induce vomiting. Obtain medical attention.
4.2. Most important symptoms and	effects, both acute and delayed
Symptoms/effects	: Not expected to present a significant hazard under anticipated conditions of normal use.
Symptoms/effects after inhalation	: May be harmful or cause irritation.
Symptoms/effects after skin contact	: Prolonged exposure may cause skin irritation.
Symptoms/effects after eye contact	: May cause slight irritation to eyes.
Symptoms/effects after ingestion	: Ingestion may cause adverse effects. May be harmful if swallowed.
Chronic symptoms	: None expected under normal conditions of use.

SECTION 5: Firefighting measures 5.1. **Extinguishing media** Suitable extinguishing media : Water spray, fog, carbon dioxide (CO₂), alcohol-resistant foam, or dry chemical. Use extinguishing media appropriate for surrounding fire. Unsuitable extinguishing media : Do not use a heavy water stream. Use of heavy stream of water may spread fire. 5.2. Special hazards arising from the substance or mixture **Fire hazard** : Not Assigned Reactivity : Sodium azide in water is a weak base. Reacts with copper, lead, silver, mercury, and carbon disulfide to form shock-sensitive compounds. Reacts with acids, forming toxic and explosive hydrogen azide. Contact with acids liberates toxic gas. Hazardous decomposition products in : Hydrogen chloride. Sodium oxides. Nitrogen oxides. case of fire 5.3. Advice for firefighters Precautionary measures fire : Exercise caution when fighting any chemical fire. **Firefighting instructions** : Use water spray or fog for cooling exposed containers. Protection during firefighting : Do not enter fire area without proper protective equipment, including respiratory protection. SECTION 6: Accidental release measures Personal precautions, protective equipment and emergency procedures 6.1. : Avoid prolonged contact with eyes, skin and clothing. General measures 6.1.1. For non-emergency personnel : Use appropriate personal protective equipment (PPE). Protective equipment Emergency procedures : Evacuate unnecessary personnel. 6.1.2. For emergency responders Protective equipment : Equip cleanup crew with proper protection. : Upon arrival at the scene, a first responder is expected to recognize the presence Emergency procedures of dangerous goods, protect oneself and the public, secure the area, and call for the assistance of trained personnel as soon as conditions permit. Ventilate area. 6.2. **Environmental precautions** : Prevent entry to sewers and public waters. Avoid release to the environment. 6.3. Methods and material for containment and cleaning up For containment : Contain solid spills with appropriate barriers and prevent migration and entry into sewers or streams. Methods for cleaning up : Clean up spills immediately and dispose of waste safely. Contact competent authorities after a spill. 6.4. **Reference to other sections** See Section 8 for exposure controls and personal protection and Section 13 for disposal considerations.
