

Jackson ImmunoResearch Products Feature in CiteAb's Top 100 Cited Antibodies and Proteins 2026 | 1

CiteAb has released its Top 100 Cited Antibodies and Proteins 2026 Reports, and Jackson ImmunoResearch is proud to have products featured in the rankings.

CiteAb is recognized as “The life science data provider”, providing researchers with the reagent search engine enabling them to cross-reference commercial reagents with published citations. Currently their database includes 5,355,666 antibodies, with 2,545,919 citations from 250 suppliers.

CiteAb is a life science data provider whose reagent search engine allows researchers to cross-reference commercial reagents with published citations. Its annual Top 100 reports draw on the CiteAb database to identify the most referenced research products of the previous year in the scientific literature.

Our products in the 2026 reports

- Our Essential Normal Donkey Serum ranked at number 10.
- Two Peroxidase (HRP) AffiniPure® Goat Anti-Rabbit IgG (H+L) products featured in the Top 100 Cited Antibodies.

These rankings reflect how widely our secondary antibodies and blocking serums are relied upon by researchers around the world, and how successful our teams have been in supporting such a broad range of published research.

Matthew Smith – Commercial director at JIR said “Our antibodies are quietly at work behind some of the most exciting research being published today. Seeing them among the most cited products in the world is a proud moment for the whole team.”
